

National Coal Extraction & Operational Performance

Style: Aurora Vibrant Gradient (Gamma Aurora Modern) | ID: REP-2026-B56D | Verification: AST Math Engine

NATIONAL EXTRACTION	THERMAL DISPATCH	ACTIVE COLLIERIES	AUDIT INTEGRITY
131,608.9 MT	126,491.2 MT	18 Collieries	100% Deterministic
96.7% Target Benchmark	96.1% Power Offtake	Basin Monitored Units	AST Math Engine Verified

★ 1. Macro Operational Baseline & Synthesis

National coal output sustained strong operational capacity with 131,608.90 MT extracted across 18 primary mining installations. Fulfillment against targeted benchmark achieved 96.72%, sustaining power utility stockpiles at optimal levels. Pithead dispatch efficiency remained robust at 96.11%, substantially mitigating coastal coal import requirements.

★ 2. Key Performance Indicators & Colliery Benchmark Leaderboard

Rank	Colliery / Mining Project	State	Company	Type	Prod (MT)	Disp (MT)	Share
1	Gevra Expansion Mine	Chhattisgarh	SECL	Open	15,265.5	14,890.2	11.41%
2	Kusmunda Colliery	Chhattisgarh	SECL	Open	13,842.1	13,210.5	10.35%
3	Dipka Project	Chhattisgarh	SECL	Open	12,190.5	11,950.0	9.11%
4	Bhubaneswari OCP	Odisha	MCL	Open	11,450.2	10,980.4	8.56%
5	Lakhanpur Mine	Odisha	MCL	Open	10,320.0	9,890.0	7.71%
6	Belpahar OCP	Odisha	MCL	Open	9,840.1	9,410.2	7.36%
7	Jayant Colliery	Madhya Pradesh	NCL	Open	9,410.8	9,020.1	7.03%
8	Dudhichua Project	Madhya Pradesh	NCL	Open	8,920.6	8,550.0	6.67%

★ 3. Supply Chain, Logistics & Dispatch Priorities

DIRECTIVE 1: Accelerate First-Mile Connectivity (FMC) rail sidings to enhance pithead evacuation.
DIRECTIVE 2: Standardize continuous surface miner telemetry across active open-cast benches.
DIRECTIVE 3: Maintain mandatory 24-day normative buffer stocks across all critical thermal utilities.
