

ESG Sustainability & Ecological Transition Audit

Audit Framework: BRSR / GRI 304 | ID: REP-2026-B56D | Net-Zero Milestone: 2047 Target

1. Core Environmental, Social & Governance Indicators

Environmental Indicator	Reported Measure	Benchmarked Standard	Environmental Impact
First-Mile Rail Offtake	82.4% Volume	>= 80.0% FMC Goal	Reduces road dust & diesel consumption
Backfilled Land Reclaimed	240 Hectares	100% Backfilled Voids	Restored to native forestry canopy
Mine Water Community Supply	14.5 Million m³	Zero Discharge Norm	Supplied for local irrigation & drinking
Occupational Safety Index	100% Zero Fatalities	Zero Harm Standard	Zero fatal occurrences across units

2. Colliery Sustainable Operation Grading (Top 6 Units)

Colliery Name	Extraction (MT)	Evacuation Type	Solar Capacity	ESG Rating
Gevra Expansion Mine	15,265.5	Rail FMC Corridor	15 MW Solar	A+ (Exemplary)
Kusmunda Colliery	13,842.1	Rail FMC Corridor	20 MW Solar	A (Compliant)
Dipka Project	12,190.5	Rail FMC Corridor	25 MW Solar	A (Compliant)
Bhubaneswari OCP	11,450.2	Rail FMC Corridor	30 MW Solar	B+ (Satisfactory)
Lakhanpur Mine	10,320.0	Road / Rail Hybrid	35 MW Solar	B+ (Satisfactory)
Belpahar OCP	9,840.1	Road / Rail Hybrid	40 MW Solar	B (Under Review)

3. Net-Zero Transition & Biodiversity Stewardship

During this cycle, 131,608.90 MT of domestic fuel was extracted under strict environmental compliance. Over 240 hectares of mined-out land were transformed into bio-diverse ecological zones. Solar power generation installations on overburden dumps contributed over 150 MW of clean captive power.
